CONDOMS 4All

Female condoms at AIDS2012

The female condom is the only available female-initiated method that provides protection against HIV and unintended pregnancies. However, many women and men who are in urgent need of prevention methods and want to use female condoms are unable to access them.

Paper dolls

At AIDS 2012, we will call attention to the large and unmet demand for female condoms with Paper Dolls. These dolls carry messages of people from all over the world on the importance of female condoms. We will display thousands of dolls, attempting to break the Guinness World Record of the longest chain of Paper Dolls. In order to collect the 30.000 messages that are required, we need your help! Please sign a doll during the conference (PTO) or sign at www.sign4femalecondoms.org.

Learn more about female condoms during this conference!

Please participate in one of these activities:

When?	Where?	What?
Monday 12.30 - 2.30 pm	Exhibition Hall	Poster presentation: 'Promoting female condom use among South African men' (MOPE350)
